

a Frontal Attack on the present Misguided Astronomy

Big Bang never was, nor could have been.
The Universe is not structured by 3 dimensions of space
with an undefined Time glued on as a 4th dimension.
The MWBR is not the birth place of the Universe.
Red-Shift is not indicative of universal expansion.
Particles have never been proven to exist.
Light is not wave propelled, neither travels as protons.
Einstein fantasies: Time's Relativity and time-travel.
Gravity: it is not mass that attracts mass.
95% of universal content still not identified by Science.

Where as

"The Cosmos of Time"

brought us for the first time ever the proper, unassailable
Definition of "Time", as base for our dissertation below:

The Universe consists of **the three dimensions of 'Time'**
layered in steps of mathematical power, as per Maxwell: $T_a T_a^2$
 T_a^3 .

From a **Point Zero**, the Spirit or **Force** of Time T_a pushes the
Matrix Sphere T_a^2 and its surrounding electro-magnetic **Mantle**
 T_a^3 **with all it contains** into the future. At the same time keeping
both the Matrix and the Mantle loaded with energy.

Astro-Jets suck up energy from the **Matrix**, fuse the energy
and encapsulate it into hydrogen H_1 , then shoot it out and inject
into the highest layers of the e.m. Mantle,

The Astro-Jets action creates a counter force, the **Recoil Force**
pulling all once created matter back into the Matrix as pure
reconstituted energy (recoil replaces gravity)
As the Recoil's *Force* increases parabolic in strength down from
the highest Mantle back toward the Matrix, so will the re-entry
speed will increase proportionally, as the **Redshift** variations
between descending objects do show.

Universal Metabolism: from the Matrix Astro-Jets suck up
energy, which on the way up into the highest Mantle, their
nozzles fuse into H_1 . From there, now on the down-leg, the
Recoil compacts the Hydrogen into all kinds of heavier and ever
heavier matter and systems, till everything once created will be
swallowed back into the Matrix, as pure again useable energy.
The advancement of **Time keeps every point in the Universe**
informed and united about every other point in the Universe.

As the Astro-Jets spout irregularly in different quantities, at different occasions, in different volumes, from different locations and force, thereby giving the newly created matter **a turbulent decent**, toward the Matrix in mostly separated, but also often in overlapping, **layers**.

Two million years ago the first humans were still in the stone age. But **the surface “stones” at the time** were not yet solidly baked by Nature into heavy, hardened rocks. **The Earth surface was still spongy**, covered by the latest rains of cosmic matter.

At the time humans managed well with bronze tools. They build whatever with the same ease as the Eskimos of today still cut snow-blocks to size and staple them up into igloos where time and weather harden them to ice-blocks.

After the Pyramids (used to **chart the heavens**) the use of big stones, as they got heavier and harder, declined rapidly. Thus today we work exclusively with bricks, cement, aluminum and plastics!

In general, the heavier the stones found on archeological sites, the older the ancient culture must have been. Be prepared ! the rapidly shortening time spans and the growing heaviness show that **our Earth might already soon nearing its final steep fall back into the Matrix**
